

ATEX UNDER REQUEST

MINERVA FTIC-0650 | FTIC-0800

The “MINERVA” centrifugal sieving machines are used when high productivity is required and can be used for two types of sieving:

- > Sieving separation of different grain sizes of bulk product with poor flow properties.
- > Safety screening of the finished product, to remove possible impurities.
- > Used in industrial sectors such as food, chemical or pharmaceutical, etc. Suitable for a wide range of products such as flours, sugars, cocoa, ceramics, varnishes, pigments, plastics, etc.
- > It is manufactured in AISI-304 stainless steel or (AISI-316 on request). Gaskets and product contact elements according to FDA regulations.
- > Equipment suitable for pneumatic transport.

TECHNICAL FEATURES					
	Voltage (V)	Freq. (Hz)	r.p.m	Power (kW)	Weight (Kg)
FTIC-0650	400/460	50/60	690	1.1	170
FTIC-0800			750	2.2	310

EQUIPMENT DIMENSIONS

	FTIC-0650	FTIC-0800
A	930	1122
B	1800	2200
Ø C int	145	195
Ø D int	120	120
Ø E int	250	250
